

Accessibility Tools

I used Chrome DevTools to inspect the accessibility of my website and 3 other websites that I frequent.

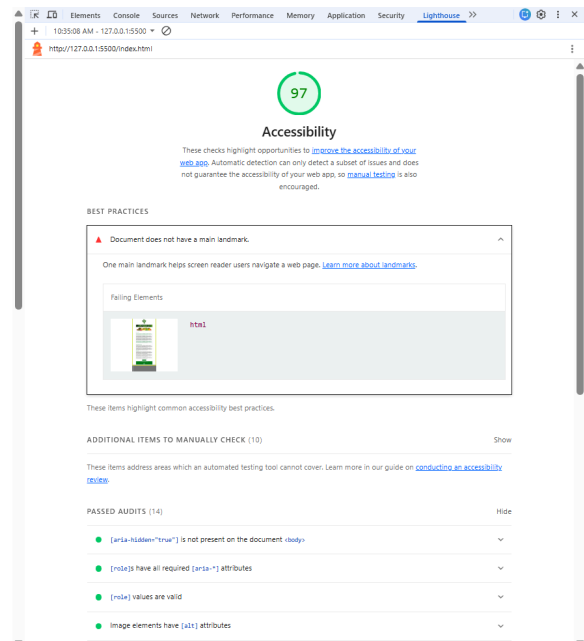

Pros: Chrome DevTools is easy and fast to use. It provides a detailed breakdown of what your site has done right and hints as to what you can do to resolve any issues.

Cons: Chrome DevTools does not tell you where exactly the source of the issue is. It just tells you the general element or attribute issue and points you to documentation of best practices.

1. **My website** scores a 97/100 on accessibility. I use roles for relevant elements, proper image styling for responsiveness, and semantic elements as needed.

Pros: no hidden values, roles have required aria attributes, role values have attributes, images have alt attributes, contrast is good, html has valid lang attribute, heading elements are in sequential descending order, deprecated aria values are not used, and role attributes do not have conflicts

Cons: there is no main landmark; however, this is not safe for email html, so this can be disregarded.

2. The **CSUN website** scores a 100/100 on accessibility.

Pros: identical links have the same purpose, video elements have track elements with captions

Cons: N/A (the site scored a 100/100)

The screenshot shows the CSUN website with a large banner for "Earn Your Degree as a Matador!". The banner includes the text "Get a top-ranked, affordable education at a public university in Los Angeles. Apply today." and a red button labeled "About This Video". Below the banner is a red bar with the text "Academic Programs & Majors". The right sidebar displays the Lighthouse accessibility audit results, showing a score of 100. The audit details include sections for Audio and Video, Best Practices, Additional Items to Manually Check (10), Passed Audits (26), and Not Applicable (35). The audit was generated by Lighthouse 13.4.1 on September 15, 2026, at 10:39 AM.

3. **Google** scores a 98/100 on accessibility.

Pros: it has aria roles on compatible elements and contains a heading/landmark region

Cons: the site does not have a main landmark

The screenshot shows the Google homepage with a banner for "REGISTER TO VOTE!". The banner includes the text "REGISTER TO VOTE!" and "REGISTRATE PARA VOTAR!". Below the banner is a search bar with a microphone icon and a button labeled "AI Mode". The right sidebar displays the Lighthouse accessibility audit results, showing a score of 98. The audit details include sections for Best Practices, Navigation, Additional Items to Manually Check (10), Passed Audits (23), and Not Applicable (37). The audit was generated by Lighthouse 13.4.1 on September 15, 2026, at 10:46 AM.

4. **Canvas** scores a 100/100 on accessibility.

Pros: the site has keyboard-focusable interactive controls, a logical tab order, landmark elements, and roles/labels for custom controls

Cons: N/A (the site scored a 100/100)

The image displays two side-by-side screenshots. The left screenshot shows the Canvas LMS Dashboard for a user named 'Account'. The dashboard is organized into sections for 'Today' (September 15) and 'Tomorrow, September 16'. Under 'Today', there are announcements for 'GEOL 110 THE FOSSIL RECORD - (17110-FA2026)' and 'COMP 467 MULTIMEDIA SYSTEM - (16799-FA2026)', both marked as 'Submitted'. The 'Tomorrow' section shows 'Nothing Planned Yet'. The right screenshot shows the Lighthouse Accessibility report for the URL 'https://canvas.csun.edu/'. The report indicates a score of 100 and lists 10 additional items to manually check, including 'Interactive controls are keyboard focusable', 'Interactive elements indicate their purpose and state', 'The page has a logical tab order', 'Visual order on the page follows DOM order', 'User focus is not accidentally trapped in a region', 'The user's focus is directed to new content added to the page', 'HTML5 landmark elements are used to improve navigation', 'Offscreen content is hidden from assistive technology', 'Custom controls have associated labels', and 'Custom controls have ARIA roles'. The report also mentions 'PASSED AUDITS (26)'.
